

M5 HOME SERIES

OWNER 'S MANUAL

LISTENING ENJOYMENT

There is no greater comfort than sitting on the sofa to watch a movie or listening music of the most relaxed way. We are constantly working to provide the best listening experience and create the same feeling of a live musical or film performance. Uandksound knows the importance of feeling good at home surrounded by a pleasant environment where everything maintains an aesthetic coherence. We have always keen on to design products with a double function, functional and aesthetic.

Fashions change and adapting to them is very important, for this reason we have worked on the new M5 series, an evolution of the successful M3, but adapted to more discerning domestic environments where not only aesthetics prevails also an avantgarde sound prepared to reproduce high-resolution audio from the best films and music recordings. M5 Series are engineered with great care to integrate their visual presence in your interior.

The result is a refined entertainment experience without disrupting the beauty of your surroundings. All our products and components are proudly designed in Europe and our skilled and well trained engineers test every component carefully.

PERFORMANCE

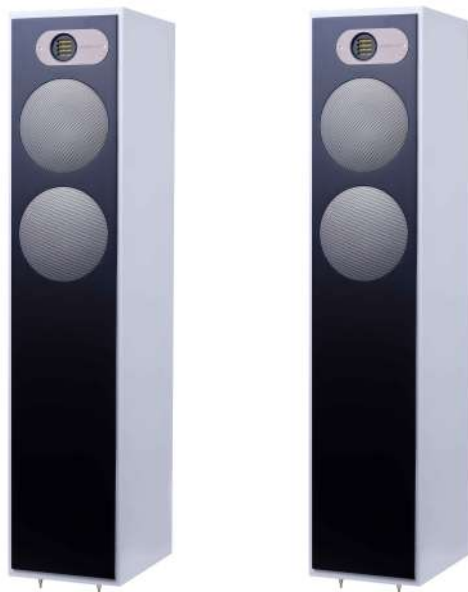

The new internals for the M5 series include an improved crossover that provides excellent linear response through a high-density structured cabinet to get an outstanding dynamic range, especially for home theater applications. Our renowned Air Motion ribbon tweeter is already implemented in many of our loudspeakers like M5 series. A more defined response and extended high frequency is only achieved with the most advanced components.

The internal structure of M5 Series has been developed in such a way that parallel surfaces are avoided inside to achieve a better sound diffraction and offering less distortion with high sound pressure levels.

M5 Series family consists of front, center and surround channels, also a dedicated active subwoofer. All this makes this equipment the perfect fashion loudspeakers solution to enjoy the best sound at home without the need of complex installations. Our timeless design will be the best warranty to enjoy the best sound in harmony without disrupting your home decoration for a long time.

MODELS AND FEATURES**M520LR (front channels)**

M520LR floorstanding speakers are slim columns that provide a full range of sound reproduction. They can be used for stereo systems and home theater installations, either as front or effect speakers. It is advisable during the installation process to keep at least a distance of 30cm from the walls to obtain an adequate sound image. It is also important to know technical parameters of your amplifier in order to achieve an adequate performance without damaging the woofers. A 50 hour pre-shoot is advisable to get the most out of your M520LR speakers.

Impedance	4 ohms
Freq. Response	40 Hz - 22 Khz
Power	80 - 160 W
SPL	88 dB +/-1.5 db
Woofer size	2 x 4"
Dimensions	900 x 190 x 253 mm
Weight	10.45 kg
Colour	white gloss

MODELS AND FEATURES**M500SR (Surround channels)**

M500SR speakers are very versatile for small stereo or home theater systems. However uandksound kindly recommends M500SR speakers for surround channels because of the slim design. On the back side M500SR speakers have an easy fastening system for any installation. The small size may go unnoticed, but the great sound not.

Impedance	4 ohms
Freq. Response	60 Hz - 22 Khz
Power	80 - 120 W
SPL	87 dB +/-1.5 db
Woofer size	1 x 4"
Dimensions	269 x 190 x 120 mm
Weight	3.22 kg
Colour	white gloss

MODELS AND FEATURES**M530C (Center channel)**

M530C speaker is designed specifically for home theater systems. The loudspeaker can be easily installed with the built-in fixing system if you want to hang it on the wall. It is very important that the M530C position can be equidistant from the front speakers for the best listening experience.

Impedance	4 ohms
Freq. Response	50 Hz - 22 KHz
Power	80 - 160 W
SPL	88 dB +/-1.5 db
Woofer size	2 x 4"
Dimensions	495 x 190 x 180 mm
Weight	5.9 kg
Colour	white gloss

MODELS AND FEATURES

M1000SW (Active subwoofer)

M1000SW is an impressive bass unit that houses a powerful class D amplifier capable of delivering a maximum of 300 watts of power. Designed to be integrated with a wide range of speakers, it turns out to be the ideal companion for the new M5 series. Fine-tuning of the gain, phase and cut-off frequency control offers the maximum sonic performance in any room.

Freq. Response	40 Hz - 250 Hz
Max. Power	300 W
Enclosure	bass reflex/MDF
Woofer type	coated paper
Woofer size	10"
Size	324 x 363 x 324 mm
Weight	13.53 kg
Colour	white gloss
